46.118 Application and proposals lacking definite plans for
involvement of human subjects

Certain types of applications for grants, cooperative agreements, or contracts are submitted to departments or agencies with the knowledge that subjects may be involved within the period of support, but definite plans would not normally be set forth in the application or proposal. These include activities such as institutional type grants when selection of specific projects is the institution's responsibility; research training grants in which the activities involving subjects remain to be selected; and projects in which human subjects' involvement will depend upon completion of instruments, prior animal studies, or purification of compounds. These applications need not be reviewed by an IRB before an award may be made.

**HOWEVER...NO HUMAN SUBJECTS MAY BE INVOLVED
IN ANY PROJECT SUPPORTED BY THESE AWARDS
UNTIL THE PROJECT HAS BEEN REVIEWED AND
APPROVED BY THE IRB.**
